

Free risk management health check terms and conditions

ECS riskAssist IT System Health Check

A summary of what is included in the health check:

- Documenting the servers and roles on site
- A review of the backup schedule and restoration plan
- Analysis of the Antivirus in place
- A check of firewall security settings
- Assessment of UPS connectivity and all connections
- A brief look at PCs on site
- Identify any areas of concern.
- A full report with recommendations, weakness and improvements will be provided.

We will not do any detailed penetration testing (we will not try to hack into any systems).

To qualify for this offer:

1. We will require the full attention of the company principle, director or owner for the duration of the health check to answer any questions and enable us full access to the company's current risk management procedures.
2. We must be able to access your main server and require log in details to do so.
3. Completion of a pre survey checklist will be required before we can agree to the health check.
4. Your main location must have 5 or more working computers with an on-site or cloud based server.
5. The free IT Systems Health Check is limited to one site only. Any further site health checks can be arranged at an additional cost.
6. This limited time offer ends on Friday 30th May 2014 and your IT Systems Health Check must be completed on or before 30th June 2014.

ECS riskAssist Health & Safety Health Check

A summary of what is included in the health check:

- Review of current health & safety documentation.
- Analysis of the company's current practices.
- Review of the company's physical aspects.
- In depth review and analysis of the company's current health & safety and working practices.
- A full report with recommendations, weakness and improvements will be provided.

To qualify for this offer:

1. We will require the full attention of the company principle, director, owner or health & safety manager for the duration of the Health Check to answer any questions and enable us full access to the company's current health & safety procedures.
2. A pre survey checklist will be required before we can agree to the Health & Safety Health Check.
3. You must have 5 or more employees at your main site.
4. The free Health & Safety Health Check is limited to one site only. Any further site health checks can be arranged at an additional cost.
5. This limited time offer ends on Friday 30th May 2014 and your Health & Safety Health Check must be completed on or before 30th June 2014.

Fleet Risk Management Health Check

The purpose of this health check is to:

- 1) Protect the directors of a business from prosecution.
- 2) Protect your claims record and getting/keeping insurance costs down.
- 3) Keep you, your drivers and other road users safe.

A summary of what is included in the Health Check:

- We will spend time with you assessing your current approach to Occupational Road Risks e.g. the Health & Safety approach; REMEMBER, if there is no written evidence then you'll struggle to prove it!
- Management and documentation of drivers (experience, behaviours, control measures, instructions, routing, CPC if relevant, telematics etc.)
- Vehicle controls and documentation e.g. servicing and maintenance, tachographs (where relevant)
- We'll then look into the Operational Risks e.g. preventing accidents, managing accidents when they happen, defending you when there is an accident, fuel efficiency, telematics, keeping you mobile
- We then report back to you with our recommendations on how you can put some measures into place to help the business (and the directors). Some can be very simple low cost options but even these can have a positive impact and if nothing else shows your insurance company that you take the management of your fleet more seriously than many.

To qualify for this offer:

1. We will require the full attention of the company principle, director, owner or transport manager for the duration of the health check to answer any questions and enable us full access to the company's current Fleet Risk Management procedures.
2. You must have a fleet of 5 or more vehicles
3. Completion of a pre survey checklist will be required before we can agree to the health check.
4. The free Fleet Risk Management Health Check is limited to one site only. Any further site health checks can be arranged at an additional cost.
5. This limited time offer ends on Friday 30th May 2014 and your Fleet Risk Management Check must be completed on or before 30th June 2014.
